

Mining

A legacy of precision hydraulic craftsmanship

Today's dynamic mining operations have little tolerance for costly downtime. Hannon Hydraulics offers a unique and convenient cylinder core exchange program to keep our customers running at an affordable cost. We stock various cylinders for heavy equipment, such as Caterpillar, Hitachi, Terex, Komatsu and Euclid, which have been remanufactured back to original equipment manufacturer (OEM) specifications.

Our exchange program is backed by a one-year/unlimited hour warranty.

If we don't have something available on our shelf or an exchange cannot solve your problem, as craftsmen experienced in hydraulic repair and manufacturing, we have a team of hydraulic experts that can move quickly and offer custom solutions to your most challenging equipment problems. We are committed to provide you with the world's finest service in hydraulic cylinders, equipment and parts.

- Off-Road Trucks
- Loaders
- Wheel Scrapers
- Dozers
- Motor Graders
- Wheel Scrapers
